

## **Intern / Research Assistant position**

### **Software Development**

The Computer Graphics Laboratory is offering a part-time Internship/Research Assistant position (20-50%) in software engineering to support the development of MineTime, an innovative groupware scheduling system ([minetime.ai](http://minetime.ai)).

#### **Tasks**

Design and development of new visual analytics tools for calendar data; porting Machine Learning models into production and integration in MineTime; design and development of a backend system for analytics and support to groupware features. The priority of the tasks will be discussed taking into account the background and interests of the candidate.

#### **Required Skills**

- Solid programming skills
- Experience with web technologies (HTML, Javascript, REST, and ideally Node.js)
- Basic understanding of NoSQL databases
- Experience with Visual Analytics and/or Machine Learning

#### **Contact / Application**

Interested candidates send their applications to Marco Ancona,
